

THE INDEPENDENT

HELENA, MONT., JUNE 18, 1889.

PUBLISHED EVERY MORNING EXCEPT MONDAY.

INDEPENDENT PUBLISHING CO., PUBLISHERS.

OFFICE, BROADWAY.

TERMS OF SUBSCRIPTION: By mail, per month, \$1.00; by carrier, per month, \$1.00; by mail, per year, \$10.00; by carrier, per year, \$10.00. Single copies, 5 cents.

OFFICIAL PAPER OF LEWIS AND CLARK COUNTY.

The INDEPENDENT has a larger daily circulation than any newspaper between St. Paul and Portland and a larger circulation than any other daily paper published in Montana.

It has no great moral secrets; its subscription books are open to inspection, and it is always ready to prove that its circulation is as represented.

Entered as Second-Class Matter, June 18, 1889.

POLITICS AND THE COURTS.

If what the Salt Lake Tribune alleges against Judge Sanford be true, that person would have made a fit subject for impeachment proceedings; but for the president's refusal to call for his resignation on the ground that his administration of the office of chief justice of Utah was not in harmony with the policy the president deemed proper to be pursued with reference to Utah affairs. How far the executive may be justified in forming and pursuing a policy in a purely judicial matter is a question which will excite some difference of opinion. In general terms, the executive is not entirely independent of the legislature, and the judicial is also, but the anomaly in the United States of territorial government gives the president a power, which he may use or abuse according to his own will, over the judiciary of the territories. It is a matter of which there has been no concealment that the recent change in judges for the territory of Utah was made in furtherance of the president's idea that the Edmunds law had not been enforced by Judge Sanford with sufficient rigor, and Judge Zane, whose administration of the law had been as harsh as it could well be, was reappointed with the express understanding that the Mormons shall be given the extreme penalty of the law. Whatever may be the rights of the question, it is certainly a strange spectacle in this country to see a judge appointed for the purpose of administering a certain law in a certain way. That such things can be done without exciting general protest is due in a large measure to the absence of any public sympathy with the Mormons; but if it is possible for the executive to instruct the judicial branch of the government, the fact may some day be made apparent in a way that will add more people than the Mormons and assailable liberties that it is the duty of the president to protect rather than to infringe. The fact that the president, representing the executive, has a policy which he proposes to enforce by the judiciary, marks a point of danger which challenges the attention of the legislative department of the United States government.

IRRIGATION CONTROVERSIES.

The statement made before the Society of Civil Engineers at its meeting in this city Saturday evening that the scarcity of water in the Ten Mile and Prickley Potholes had caused a great deal of trouble between neighbors claiming irrigation rights on the several streams and ditches thereabout, and that men have undertaken to defend what they claim their rights by force of arms, constitutes a strong argument for the enactment of laws which will encourage the extension of irrigation enterprises and put the regulation of them in the hands of recognized officers of the country, territorial or district. The existence of conditions similar to those now prevailing have in the past led to bloodshed and more frequently to enmities between former friends that bid fair to last out the lives of those who are concerned, and it would not be at all surprising if conflicts over water rights should again break out between homicides and lasting feuds. The need of a law which shall equitably regulate the enjoyment of water privileges is imperative in Montana, while the scarcity of water for agricultural and mining enterprises shows the necessity of establishing storage reservoirs that may be drawn from in time of need. These are things that will demand the attention of the first state legislature of Montana, which will probably assemble in November next, and possibly something will have been learned by that time of what the national government is likely to do in the premises. A government engineer is now in Montana investigating the subject of irrigation under direction of Major Powell, of the United States geological survey, and others are at work in the same line in various parts of the west. All of this is encouraging to ranchmen and farmers, who, pending the perfecting of a thorough system of irrigation districts, must bear with each other as best they can and avoid conduct which will provoke breaches of the peace between themselves and their neighbors. There is, no doubt, an abundance of water; it only requires to be harnessed for the dry season, when, with proper regulation of its outflow, all will be abundantly supplied.

At the present time the newspapers have frequent mention of English companies buying large tracts of land in the United States, sometimes in the south and sometimes in the west, upon which colonies are to be located. Yesterday's mail contained mention of two schemes of this description, one located in North Carolina and another in Southern California, near Santa Anita. There is some ground for the suspicion that these enterprises are not what they appear to be, but that they are gotten up for the purpose of evading the laws of this country on the subject of assisted emigration and contract labor. The subject certainly is one that deserves the attention of the national authorities. This country is obtaining altogether too many immigrants of the two classes indicated, in spite of the well-intended laws enacted to restrict the influx of European paupers.

KING HERBERT, of Italy, has assumed a task that might well have caused Hercules to quail. The August stable, after it had been occupied thirty years by three thousand oxen, without having once been cleaned, was ordered and neatly exemplified in comparison with the city of Naples, where people have lived for centuries in the midst of indescribable filth, breeding pestilence to infect the world. The last cholera epidemic

there, three years ago, called attention to the wretched condition of the habitations of the poor, and the Italian king himself saw the need of his subjects. His plan for rebuilding the city and installing proper sanitary conditions will, when executed, demonstrate his right to be known as one of the greatest benefactors of mankind, as his personal investigation of the epidemic alluded to and its causes showed him to be a brave and humane ruler.

Dr. E. ISAACSON, who was formerly known to the people of San Francisco under the name of Dr. Joseph, but whose real name is Isaacs, has completed the translation of the Book of Mormon into Hebrew language, "sustained by the mighty faith of the prophets and apostles who called me to do this great and glorious work." On the showing of a San Francisco paper, the object of all this distinguished solicitude on the parts of the prophets and apostles is a thorough-paced fraud, impostor and deceiver, who has swindled Jews and Gentiles right and left, and now, apparently, has turned his attention to the Latter Day Saints, with the purpose of levying contributions upon them as he has upon others.

CAPT. J. B. CATLIN, of Stevensville, whom the republican leaders of this territory persuaded to relinquish his claim to the internal revenue collectorship in order that a dangerous candidate for the governorship might be provided with a snug berth, has been made Indian agent for the Blackfoot. The consciousness of a sacrifice of his own interests for the sake of harmony among the party leaders will no doubt go far towards making Capt. Catlin's exile endurable to him.

The order for the discontinuance of the postoffice at Walkerville has been rescinded, and peace once more reigns in the vicinity of the "greatest mining camp on earth." But none of the credit is due the able and efficient delegate-elect from Montana, who was in large measure responsible for the issuance of the original order, just as he procured the removal of a republican railway mail clerk only to have him reinstated a week later.

EX-GOV. MURRAY, of Utah, has retired from public life and assumed the editorship of the Union, published at San Diego, Cal., where the boom of the real estate speculation is periodic if not permanent. With Gov. Murray's Kentucky record, back of him, it is difficult to see wherein journalism is to be the gain of his new departure.

A WELL-KNOWN writer on cooking is a well-known fact. There will be no surprise, therefore, that it is owing to persistent attacks upon her digestive system by the articles of food she has concocted in the course of her career as a literary cook.

THE WATER QUESTION.

A Correspondent Thinks Ten Mile Will Furnish Water.
HELENA, June 17.—[To the Editor Independent.]—The water question being up for discussion in the Ten Mile, I thought I would mention to the sources of Ten Mile. Messrs. Mead, Hackney and Tenis are now using the waters of Ten Mile for their irrigation. The water is pure and sweet, and the Ten Mile is a great source of water for the irrigation of the valley. The water is pure and sweet, and the Ten Mile is a great source of water for the irrigation of the valley. The water is pure and sweet, and the Ten Mile is a great source of water for the irrigation of the valley.

PERSONS AND THINGS.

The president of Paraguay now wants to spend \$50,000 to encourage European immigration into his country. The existence of conditions similar to those now prevailing have in the past led to bloodshed and more frequently to enmities between former friends that bid fair to last out the lives of those who are concerned, and it would not be at all surprising if conflicts over water rights should again break out between homicides and lasting feuds.

The champion pancake eater of California lives at Compton, Los Angeles county. He recently ate fifty-two cakes of the usual size for breakfast. Silas Prather, a rancher of Fresno county, Cal., died \$10,000 worth of property to his wife, and now says he will marry her if she will restore half of it to him. The county division election in Los Angeles, Cal., has been held and the vote is five to one in favor of the new Orange County. The new Orange County was practically no opposition. These are things that will demand the attention of the first state legislature of Montana, which will probably assemble in November next, and possibly something will have been learned by that time of what the national government is likely to do in the premises.

A government engineer is now in Montana investigating the subject of irrigation under direction of Major Powell, of the United States geological survey, and others are at work in the same line in various parts of the west. All of this is encouraging to ranchmen and farmers, who, pending the perfecting of a thorough system of irrigation districts, must bear with each other as best they can and avoid conduct which will provoke breaches of the peace between themselves and their neighbors. There is, no doubt, an abundance of water; it only requires to be harnessed for the dry season, when, with proper regulation of its outflow, all will be abundantly supplied.

At the present time the newspapers have frequent mention of English companies buying large tracts of land in the United States, sometimes in the south and sometimes in the west, upon which colonies are to be located. There is some ground for the suspicion that these enterprises are not what they appear to be, but that they are gotten up for the purpose of evading the laws of this country on the subject of assisted emigration and contract labor. The subject certainly is one that deserves the attention of the national authorities. This country is obtaining altogether too many immigrants of the two classes indicated, in spite of the well-intended laws enacted to restrict the influx of European paupers.

KING HERBERT, of Italy, has assumed a task that might well have caused Hercules to quail. The August stable, after it had been occupied thirty years by three thousand oxen, without having once been cleaned, was ordered and neatly exemplified in comparison with the city of Naples, where people have lived for centuries in the midst of indescribable filth, breeding pestilence to infect the world. The last cholera epidemic

support thousands of cattle and sheep, and its extensive agricultural regions produce all the cereals in abundance, the yield per acre being in some instances the largest in the world. Among the useful and valuable products of the Web Foot State may be mentioned Oregon Kidney Tea, which has proved a boon to thousands afflicted with pain in the back and kidney difficulties. It is purely of vegetable composition and never fails. Sold by E. S. Hale & Co., wholesale and retail agents, Helena.

It should be generally known that Dr. Henry's Dandelion Tonic is a powerful blood purifier, and it is a great remedy for all diseases of the blood, such as skin eruptions, pimples, and all other diseases of the skin. It is a powerful blood purifier, and it is a great remedy for all diseases of the blood, such as skin eruptions, pimples, and all other diseases of the skin. It is a powerful blood purifier, and it is a great remedy for all diseases of the blood, such as skin eruptions, pimples, and all other diseases of the skin.

THE MARKETS.

STOCKS.
New York, June 17.—Bar silver, 92 1/2. Copper—Nominal, June, \$12.10. Lead—Dull; firm, domestic, \$10.75. Stocks were fairly active to day, a greater proportion of business having been done in the regular list than for several months. Some of the transactions were as follows: Union Pacific, 100 shares, \$100.00; Union Pacific, 100 shares, \$100.00; Union Pacific, 100 shares, \$100.00.
